AR72 Automatic Chlorinator Brominator
In-line Model
The chemical dosing unit has been designed for installation in the pool’s return line for use with slow dissolving Tri-chlorine or Bromine tablets. The quantity of sanitiser is quickly adjusted to give the required residual by way of the easy to use inlet valve.

To avoid the build up of gasses being trapped inside the feeder when the pump is shut off, it must be installed above water level and below the filter outlet. The manufacturer strongly recommends the installation of a non-return valve to protect the plant room from chemical attack, should the situation arise where water siphons back through the system.

Chlorine / Bromine In-Line Feeder

Technical Characteristics
- Connection: 1.5" Screw thread
- Max pressure: 2kg/cm²
- Max capacity: 3kg
- Max dosage: Chlorine - 35gr/hr
  Bromine - 2gr/hr
- Recommended Chlorine: 20-80m³
  Bromine: 4-50m³
